# What Are AI Tools?

AI tools are software applications that use artificial intelligence to automate, enhance, or simplify tasks.

In education, these tools support teaching, learning, content creation, research, and accessibility by using machine learning, natural language processing, and computer vision.

# 5-layer GUIDE for AI Prompts

- **Take a Role** (*Take the role of a research assistant, take the role of a 15 years experienced biochemist, take the role of a post graduate student, Take the role web developer using Laravel 6.0, etc*)
- **Explain the problem** ( *I want to learn python programming within 30 days, Teach me like a teenager, Ask me questions that will make your responses personalized for me, when you give me the syllabus I will validate it and ask you to proceed*)
- **Cite examples** (*I need guides like.....*)
- **Specify what you don't want** (*I need an adaptable format, explain to me in 6 basic steps, insert the corresponding images, etc*)
- **Format** (*I want to use google colab to learn, I want a downloadable pdf version*)
